Objective

- Control the main building access inside and outside working and visiting hours
- Control personnel and visitors access to the building

Solution

- Combine different access control devices, personnel cards (magnetic, proximity, biometrics), readers, with access control management

Advantages

- Control access outside working hours
- Avoid non-authorised people to access to the building
- Monitor entries and exits
- Regulate and control access to the office
- Prevent from non-authorised people to access the offices
- Flow control and management
